Title：	Fee-charging Standards for the Application of Radio Frequency Allocation Review by Telecommunications Enterprises Ch
Date：	2022.11.07
Legislative：	Formulated and announced in 4 articles by Ministry of Digital Affairs Order No. 11160003191 on November 7, 2022
Content：	Article 1 These Standards are promulgated according to Article 92 of the Telecommunications Management Act (hereinafter referred to as the Act). Article 2 With regard to applications for radio frequency allocation review by telecommunications enterprises according to Paragraph 1, Article 53 of the Act, the review fees are as follows: Mobile communications network frequency allocation: NT$1 million per piece. Newly established satellite communications network (or satellite system) radio frequency allocation: NT$1 million per piece. Additional or modified radio frequencies in existing satellite communications networks: NT$500,000 per piece. Application for allocation of satellite communications network frequencies at the expiry of the frequency use period based on the original allocated frequencies: NT$5,000 per piece. Article 3 Applicants who have paid the fees as stipulated in these Standards may not request a refund, except in the case of overpayment, payment by mistake or as otherwise provided for in the regulations. Article 4 The Standards shall become effective on August 27, 2022.
